

Why Teeter Hang Ups?

We know that you have a lot of choices when it comes to inversion tables... You may have noticed that Teeter Hang Ups inversion equipment is not the cheapest available, nor is it the most expensive. So why Teeter Hang Ups?

Because of our commitment to meeting high standards for quality and durability, we have made manufacturing choices that result in the best quality product at the most reasonable price. We hope that you'll put your trust in the incredible amount of research, testing and experience that has gone into making Teeter Hang Ups the best quality, most reliable inversion equipment on the market today.

Independent Engineering Tests. During an independent engineering study of the 7 most widely distributed inversion tables, the Teeter Hang Ups outperformed competitors in structural integrity and durability.

UL Testing. There are no government regulations to control the structural integrity and product quality of inversion products. Make sure that your inversion option can quantify their claim of safe equipment by providing certificates or classifications to demonstrate successful voluntary testing to effective standards, like UL 2601-1.

25+ Years Experience. STL International, Inc is the longest continuous supplier of inversion products to the world. Roger and Jennifer Teeter started this company in 1981 with a commitment to educating the world about the benefits of inversion. They are still leading the way to this day.

30-day money back guarantee. We are so positive that it will change your life that if you are unsatisfied with the product we will give you a full product refund up to 30 days after your purchase.

Commitment to Safety. We are in continuous contact with a quality-assurance engineering firm that inspects Teeter Hang Ups products for top quality.

Continuous Improvement. We never stop trying to improve upon design and function. The F5000 Inversion Table, for example, has benefited from over 70 upgrades to increase quality, ease of assembly and user friendliness. We sell our products for the most reasonable price without sacrificing material quality and workmanship.

5-Year Warranty. Our commitment to product quality is unparalleled, that's why we offer a full 5-year product warranty on our home-use inversion equipment*, covering all structural and soft parts.

Unique Features. Most products in our inversion line carry one or more U.S. or International patents. Our products offer many features, unique only to Teeter Hang Ups, that ensure safety, comfort and ease of use. The F5000 Inversion Table, for example, comes equipped with patented cam locks, the ability to quickly fold down for storage, curved ankle rollers, a washable nylon mat, and the option to upgrade with accessories like Teeter Hang Ups Gravity Boots.

Belief in what we do. Inversion is all we do - we believe in inversion and it shows! Nearly every Teeter Hang Ups employee inverts on a regular basis and our customer service staff is eager and willing to answer any questions you may have about inversion or our product line.

Wide Selection. From gravity boots to motorized inversion tables, Teeter Hang Ups offers a comfortable method of inverting to meet just about any need.

It's a Family Affair. Lead by Roger and Jennifer Teeter, the Teeter Hang Ups staff is truly dedicated to upholding the Teeter name with excellent service, top quality products and a sincere effort to educate about the benefits of inversion.

* does not include motorized Power II Inversion Table or non-inversion accessory products.
